

Banque Française Mutualiste selects SAB AT as its new core banking system

Following a competitive bidding process, the SAB AT solution was selected by Banque Française Mutualiste, the bank for each public official, to upgrade its information system.

The SAB AT software package covers all the needs of Banque Française Mutualiste for its banking activity: customer management, the origination phase up to the management of consumer loans, the management of passbook accounts, amicable and contentious collection and treasury operations. The software package also manages all exchange flows with Banque Française Mutualiste's market and distribution partners and ensures the accounting of all operations and the associated regulatory reporting production, all in multi-establishment mode.

The SAB AT solution in mode operated by SAB supports the hosting, operation and maintenance in operational conditions of the solution including future system evolutions.

SAB's offer was thus selected on the quality of its technical proposal, in particular its flexibility of use and scalability, but also for the quality of the services offered around the deployment. Indeed, SAB offers in-depth expertise in SaaS and ITO (IT Outsourcing) outsourced services.

"We were looking for a technological partner capable of perfectly understanding and comprehending our business and the challenges of its digital transformation. SAB's recognized expertise in the field of Co-Banking software has become established." said Michel Coudrais, Managing Director of Banque Française Mutualiste.

Henri Assaf, General Manager of SAB adds: *"We are proud to have won this contract, which is a sign of the confidence that Banque Française Mutualiste has placed in us in this major transition. In addition, working together with Banque Française Mutualiste and all the stakeholders involved in this project has proven to be extremely rewarding."*

ABOUT BANQUE FRANÇAISE MUTUALISTE

Banque Française Mutualiste is the bank for every public official.

Banque Française Mutualiste is the only French bank to have been created at the initiative of public sector mutual insurances that wanted to provide their members with a range of banking products and services that reflect their values.

Since 1986, Banque Française Mutualiste has offered all public officials a range of personal loans, savings and loan insurance on attractive terms.

Without office and yet close to its customers, the bank relies in metropolitan France on the branch network of its long-standing partner Société Générale, with which it renewed its partnership in 2016. This original model allows public officials to benefit from a dedicated and efficient global offer, extended with the products and services of a major banking group.

Guided by mutualist values of solidarity and civic responsibility, Banque Française Mutualiste has been committed for several years to the prevention of financial risks and the fight against bad debt and over-indebtedness.

Today, nearly 1.2 million public officials, including hospital workers, teachers, military personnel, customs officers, gendarmes, police officers, territorial agents, civil servants, etc., are clients of the bank (metropolitan France and the French overseas departments and territories).

The bank employs more than 240 people.

Its reference shareholder is the Mutuelle Nationale des Hospitaliers (MNH).
